# LAB 5

## Object Storage using Amazon S3

Bucket created:

Uploaded file:

## Enabling Version and uploaded same file twice:

The screenshot shows the AWS S3 console interface. On the left, there's a navigation pane with 'Amazon S3' selected. Under 'Buckets', the bucket 'abdullah-s3-lab-20260410-pkt' is chosen. The file 'File.txt' is selected, and the 'Versions' tab is active. The 'Versions (3)' section shows a table with three entries:

| Version ID                      | Type          | Last modified                        | Size  | Storage class |
|---------------------------------|---------------|--------------------------------------|-------|---------------|
| pLifubgZxI91ugVuEBRVzSnuLQIc... | txt           | April 10, 2026, 19:39:10 (UTC+05:00) | 9.0 B | Standard      |
| 7K_LvIFRmMcWUHL_VwF1EMvIGr...   | Delete marker | April 10, 2026, 19:38:29 (UTC+05:00) | 0 B   | -             |
| null                            | txt           | April 10, 2026, 19:34:54 (UTC+05:00) | 9.0 B | Standard      |

## Configure lifecycle rule:

The screenshot shows the AWS S3 console 'Lifecycle configuration' page. A green notification banner at the top states: 'The rule "Lab-Lifecycle-Rule" has been successfully added and the lifecycle configuration has been updated. It may take some time for the configuration to be updated. Refresh the lifecycle rules list if changes to the configuration aren't displayed.'

The 'Lifecycle configuration' section explains that lifecycle rules define actions for objects based on their age. Below this, the 'Lifecycle rules (1)' section shows a table with one rule:

| Lifecycle rule name | Status  | Scope         | Current version actions         | Noncurrent versions actions     | Expired object delete | Incomplete multipart uploads |
|---------------------|---------|---------------|---------------------------------|---------------------------------|-----------------------|------------------------------|
| Lab-Lifecycle-Rule  | Enabled | Entire bucket | Transition to Standard-IA, then | Transition to Standard-IA, then | -                     | -                            |

## Configure lifecycle rule - 2:

The screenshot displays the AWS Management Console interface for configuring a lifecycle rule. The breadcrumb navigation shows the path: Amazon S3 > Buckets > abdullah-s3-lab-20260410-pkt > Lifecycle configuration > Lab-Lifecycle-Rule. The page is divided into two main sections: 'Lifecycle rule configuration' and 'Review transition and expiration actions'.

**Lifecycle rule configuration**

- Lifecycle rule name:** Lab-Lifecycle-Rule
- Status:** Enabled (indicated by a green checkmark)
- Scope:** Entire bucket
- Prefix:** -
- Object tags:** -
- Minimum object size:** -  
When no minimum object size is specified, the minimum object size for transitions is determined by the lifecycle configuration. [Learn more](#)
- Maximum object size:** -

**Review transition and expiration actions**

**Current version actions**

- Day 0:**
  - Objects uploaded
- ↓
- Day 30:**
  - Objects move to Standard-IA
- ↓
- Day 90:**
  - Objects expire

**Noncurrent versions actions**

- Day 0:**
  - Objects become noncurrent
- ↓
- Day 60:**
  - 0 newest noncurrent versions are retained
  - All other noncurrent versions move to Standard-IA
- ↓
- Day 64:**
  - 0 newest noncurrent versions are retained
  - All other noncurrent versions are permanently deleted

## Bucket Policy added:

The screenshot displays the AWS Management Console interface for adding a bucket policy. A green success message at the top states: 'Successfully edited bucket policy.' The breadcrumb navigation shows the path: Amazon S3 > Buckets > abdullah-s3-lab-20260410-pkt. The 'Bucket policy' section includes a description and a 'Learn more' link. The policy is displayed in a JSON editor with a 'Copy' button.

**Bucket policy**

The bucket policy, written in JSON, provides access to the objects stored in the bucket. Bucket policies don't apply to objects owned by other accounts. [Learn more](#)
